## Tego25

EFFICIENT & FLEXIBLE

## CLASSIC BACK PANEL

Thanks to the innovative system design, shelves can be positioned every 25 mm in height. The optional central back panel increases the usable presentation depth by a further 25 mm – for noticeably more sales space and optimum product presentation.

## WOODEN BACK PANEL

The wooden back panel is ideal for displaying organic products and sustainable product ranges. It emphasizes environmentally friendly concepts and eco-conscious brands. At the same time, it creates a warm, natural atmosphere that is attractive for customers.

# Tego25

The Tego25 shelving system (25-mm pitch) is increasingly in demand in modern shopfitting and sets new standards in flexibility and space utilisation. With its 25-mm pitch, it enables more height adjustment of the shelves and thus offers greater versatility for individual product presentation.

Different back panel variants made of metal, wire or wood enable individual design and emphasize the effect of your product range.

Tego25 is the ideal solution for retailers, fashion boutiques, pharmacies, drugstores and exhibition spaces where the focus is on flexible, high-quality and future-proof product presentation.

- Shelves can be positioned every 25 mm in height
- Extended product placement depth

## WIRE BACK PANEL

The wire back panel ensures an open, light appearance and optimally showcases your goods thanks to maximum light transmission. It supports a transparent product display, maintains the spaciousness and is particularly suitable for modern store concepts with high visibility of the products.

## BASELEG

The H10 baseleg (10 cm) creates additional display in the lower shelf area and enables more efficient use of the bottom shelf. This allows more items to be displayed – for maximum capacity, optimum use of space and a greater variety of products in the smallest of spaces.

■ Zuverlässigkeit zählt.

■ Reliability matters.
